BASIC-ABSTRACT:

The door consists of a surrounding frame and an opening panel. The frame is made from stamped rolled sheet metal with projecting edges (7) which have holes (8) for wall fixings, and a U-shaped projection (2) for the door stop. It also has inner metal plates (4) with threaded holes for hinge fastenings, each of which is covered by an inner protective casing (6).

The door panel is made from an outer frame of stamped and welded metal strip and inner and outer surfaces of thin sheet metal, and has a recess with holes for a lock and fastenings for hinged. The inside of the door can be packed with a cardboard or rock wool heat and sound insulating material.

ADVANTAGE - Reduced material and labour requirement in manufacture. Bul. 3/27.1.96
